

*"In my world, drawing is all about capturing the moment , the gesture, and getting into the soul."*

Highly influenced by the personalities, the sounds, the sites, and even the weather, the artwork invites the viewer to create stories around the people whose work knowingly or unknowingly impact our lives.

It is about celebrating the women and men who build, create, transform and maintain the unseen or unnoticeable. It is a behind the scenes look at our communities, villages, towns and cities.
